Instruction Manual

# EmagiClip

## For the assembler:

Read all Assembly Instructions before beginning assembly of this product. Assemble this product as described in these Assembly Instructions only. To do otherwise may result in instability. All screws and bolts must be tightened securely at the end of assembly and must be checked periodically after assembly. Failure to assemble properly, or to secure parts may result in assembly failure and personal injury. Proper assembly of this product per the Assembly Instructions is the responsibility of the end-user. Call customer service at 844-94WALLS (844-949-2557) with any questions about assembly.

Emagispace® consists of raw individual components assembled by the end-user. Local building conventions, guidelines and codes should be followed at all times. ALWAYS brace or otherwise secure your EmagiBlock® wall to ensure stability while building and in the final application.

BE SURE TO ALWAYS FOLLOWING INDUSTRY STANDARD BRACING AND SUPPORT GUIDELINES TO ENSURE YOUR WALL IS STABLE.

Please phone 844-949-2557, email [info@emagispace.com](mailto:info@emagispace.com) or visit [www.EMAGISPACE.com](http://www.EMAGISPACE.com) for how-to, step-by-step assembly instructions.

PLEASE BEGIN BY FIRST ASSEMBLING (1) 12" EmagiBlock® TO FAMILIARIZE YOURSELF WITH THE BASICS BEFORE MOVING ON TO LARGER SIZE EmagiBlock®S.

Do not proceed with this manual until you are able to successfully construct a 12" EmagiBlock®.

### Safety and Proper Use of Product:

- This product is intended for indoor use on a flat surface only. Proper industry standard bracing and support guidelines to ensure wall stability during assembly is required.
- Do not use EmagiBlock® walls to support or brace any other structure. Do not allow children to climb or play on EmagiBlock® walls.
- Failure to follow the proper use and safety guidelines for this product could result in product damage and personal injury.

**YOU MUST READ ENTIRE MANUAL AND FAMILIARIZE YOURSELF WITH ALL THE PIECES AND PROCEDURES BEFORE PROGRESSING WITH ASSEMBLY.**

## How to Unitize Emagiblock®s with a EmagiClip™:

### Option #1:

1. Lay two EmagiBlock®s, face down, on the ground.

2. Align the Emagiblock®s vertically, ensuring that the seams are aligned.

3. Place a EmagiClip™, across the connector blocks, on the bottom of the Emagiblock®s.

4. Gently tap the EmagiClip™ into place, to secure the blocks to each other.

5. Ensure that the seam, between the EmagiBlock®s, is aligned.

## Option #2:

1. If two Emagiblock®s are standing in the upright position, lift the corner of one Emagiblock® and set it down over half of a EmagiClip™.

2. Lift the corner of the second Emagiblock® and set it on the second half of the EmagiClip™.

3. Ensure that the Emagiblock®s are seated securely in the EmagiClip™.

### Option 3 (Unitizing the top of a wall):

1. Starting from the far left side of the EmagiBlock® wall, install two EmagiBlock®s side by side on the top course.

2. Install an EmagiClip™ at the top of the wall to unitize the first and second EmagiBlock®s. This EmagiClip™ should be placed over the seam where the two EmagiBlock®s meet.

3. Add a third EmagiBlock® to the top course.

4. Install another EmagiClip™, at the top of the wall, to unitize the second and third EmagiBlock®.

5. Continue placing EmagiBlock®s and installing EmagiClip™s on the top course, until the top course of the wall is complete.

### How to Unitize Emagiblock®s with a Connector Block:

#### Option #1:

1. Align two EmagiBlock®s in the upright position.

2. If the Emagiblock®s are built with the merlons facing down (into the EmagiBlock®) take a Connector Block and place it across the two EmagiBlock®s. Insert the Connector Block into two cones of the first EmagiBlock® and into two cones of the second EmagiBlock®.

3. Ensure that the seam is aligned between the two EmagiBlock®s.

## Option #2:

1. Align two EmagiBlock®s in the upright position.

2. If the EmagiBlock®s are built with the merlons facing up (out of the EmagiBlock®) take a Connector Block and place it across the two EmagiBlock®s. Insert the Connector Block into two cones of the first EmagiBlock® and into two cones of the second EmagiBlock®.

3. Ensure that the seam is aligned between the two EmagiBlock®s.
