EMAGISPACE™
Build smarter.

OFFICE INTERIOR SPACE BUILT SMARTER.

These interlocking building blocks are the cornerstone of our system. Available in standard (41" high x 1ft, 2ft, and 3ft wide) and designed-to-order sizes. Every EmagiBlock® is built to a standard 4.5" depth.

Office space exists to provide a place where employees can be most productive. Effective design is the challenge for office interior build-outs today, and the speed of change is accelerating. As a result, the needs of the office are constantly changing and many designs are not flexible enough to allow companies to keep up with the change. It's now possible to keep up with these changing demands, to refresh your interior space with better, more productive options... making it more affordable to re-imagine space... to build smarter.

Emagispace® allows you to design and build for today, while readying your space for tomorrow's changes. All in any color or design pattern you can imagine, with less labor, less cost—AND it's made of reusable, environmentally friendly materials.

Build economically.
Build at a fraction of the cost of traditional methods.

Build green.
Made of environmentally friendly, recyclable materials.

Build faster.
Construct interior space up to 10 times faster.

Build on-demand.
Re-imagine space as your needs change or inspiration strikes.

PARCEL //// PENDING®

CREATE
AMAZING SPACE

CREATE SPACE WITH LESS LABOR. LESS COST. FASTER.

Emagispace® utilizes a patented, kit–based, interlocking building system to create everything from high quality solid walls, desks and cubicles to full conference rooms and offices. It can be a part of any build, 10%, 50% or 100% depending upon how much flexibility you want or need. MDF facings create a base for literally any wall covering material you desire: Stone, Vinyl, Wood and Metal and more. And, it's an open source building platform. Easily incorporate almost any style and size of door and window, including glass!

An interior build-out can now be completed at half the cost and in one-tenth the build time of a traditional construction process. **That's 50% of the cost in one tenth the time!** Additionally, the Emagispace® system's simple and sturdy EmagiBlock® can be quickly disassembled, stacked or palletized to move and reuse again and again. So, your cost savings accumulate over time with the added benefit of landfill waste going down. It's the next gen, disruptive building technology for office build-outs.

The Emagispace® platform is made from environmentally responsible materials. Unlike the landfill waste created by traditional construction methods, EmagiBlock®s can be reused multiple times and is recyclable.

EMAGISPACE® GIVES YOU THE BEST OF BOTH WORLDS.

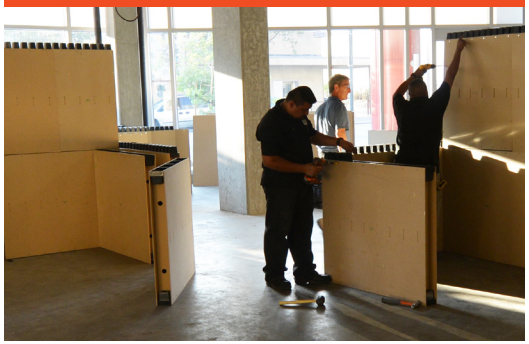
With EmagiBlock®s you can assemble a wall in 1/10th the time of traditional construction.



BUILDING BECOMES QUICK & EASY.

HOW DOES THE EMAGIBLOCK® SYSTEM WORK?

ASSEMBLE

Build your EmagiBlock® structure in minutes not hours.

SKIN & FINISH

Apply a skin/finish over the EmagiBlock® using almost any material (vinyl panels, EmagiClick wall-cladding, wood laminate, metal, drywall, etc.).

RECONFIGURE

Easily modify or expand when need or inspiration strikes. You can easily incorporate doors and windows, as well as electrical and plumbing.

Our easy to assembly components bring your ideas to life with little effort.

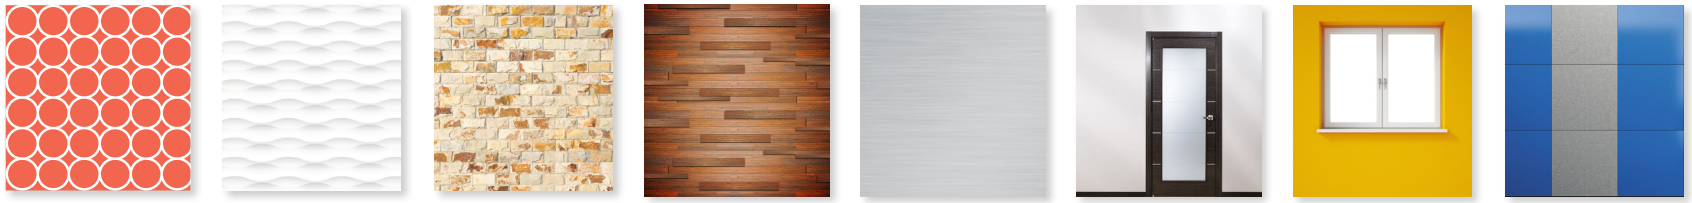
ConnectorBlocks (made of impact-resistant ABS plastic) are on the top and bottom of each EmagiBlock®.

Each EmagiBlock® is designed with horizontal and vertical channels that allow for easy placement of electrical and plumbing.

Simply invert the ConnectorBlocks and create a flat and level surface to finish/cover EmagiBlock®s.

DESIGN FLEXIBILITY IS BUILT IN.

Unleash your imagination! EmagiBlock®s can be skinned and finished with almost any material and integrated with a wide variety of windows, doors. Since we are an open source building platform, you have the option to purchase your own skins and finishes. You can use Emagispace® modular finishes, such as our revolutionary EmagiClick wall-cladding system, which come in a wide variety of colors and textures. We want to make it as easy as possible to build your vision.



Endless options for skins and finishes

There is practically no end to the number of ways to skin and finish an EmagiBlock® wall. We make it easy for you to incorporate wall coverings like vinyl panels, EmagiClick wall-cladding, wood laminate, metal, glass and drywall.

FINISH LEVELS.

Smooth (like traditional smooth white wall finishes).

Patterned finishes can be troweled on like stucco and plaster.

Seemed finishes such as brick patterns, wallpapers, etc. are easily applied.

Seamless finishes work just as they do with any construction wood product. Traditional tape, putty, and paint processes are easily achieved.

New cutting edge 3D relief thermoplastics that are printable from deep relief to flat patterns and come in a vast array of colors and finishes.

White to saturated, almost all of the above options allow for painting in any color.

EmagiClick wall-cladding system

A revolutionary finishing system, EmagiClick quickly and easily installs up to 7 times faster than traditional finishes on desks or cabinets and drywall or plasterboard. A virtually seamless finish with contemporary aesthetics, EmagiClick is the perfect modular, adaptable, covering that allows for quick reconfiguring and redecorating.

MDF decorative panels

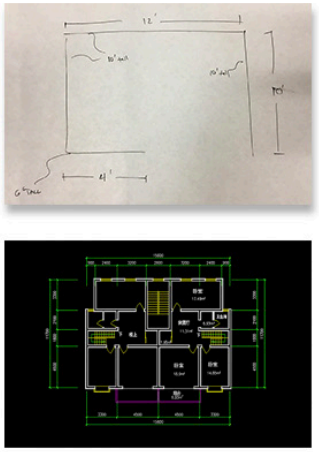
EMAGISPACE® has assembled a vast array of inspiring solutions designed to meet your aesthetic and practical needs. We offer a wide array of finishes that mount to MDF panels which are then attached to EmagiBlock®s. From bare MDF, to colors, to focal point, to mood setting, we can provide anything from dry-erase and cork-board to engaging and provocative digital images in 3D relief, to acoustically damping flush mounted baffles.

BUILD SPACE WITHOUT LIMITATIONS.

Emagispace® prides itself on being an open source building platform. Simply source your own window or door and you'll be able to mount it easily and quickly to our system. You can even incorporate entire walls of windows and doors, in almost any wall location. Steel apertures, with windows or doors mounted inside, can be framed or frameless and come in virtually any size: Transom windows, square paned windows, ADA compliant double doors, single hinge doors, Dutch doors... you name it... EmagiBlock®s simply mount around any window or door. You can also mount 2' or 3' square windows inside an EmagiBlock® for even more design options.

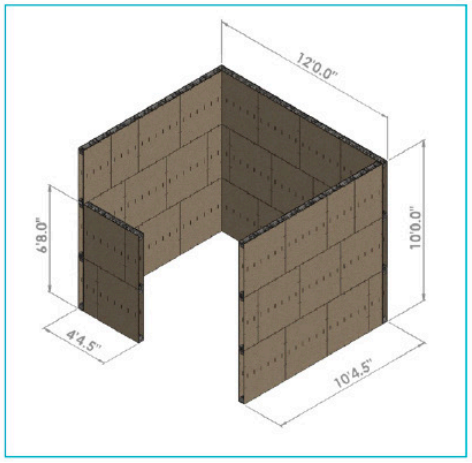
WE MAKE IT EASY TO BUILD WITH EMAGISPACE®.

Using your design information, we will provide you a comprehensive project design plan; specifying all the Emagispace® components needed to build your project. Our team of experts are available for input and insights throughout the entire building process.



Design Information

From basic drawings to CAD renderings, our team is here to help bring your project to life.



Project Design Plan

From your design information, we produce a project design plan that details all the Emagispace® components required to build your specific project.

Production

Our design and construction experts are available to consult with you about any product insights or issues throughout your building process.

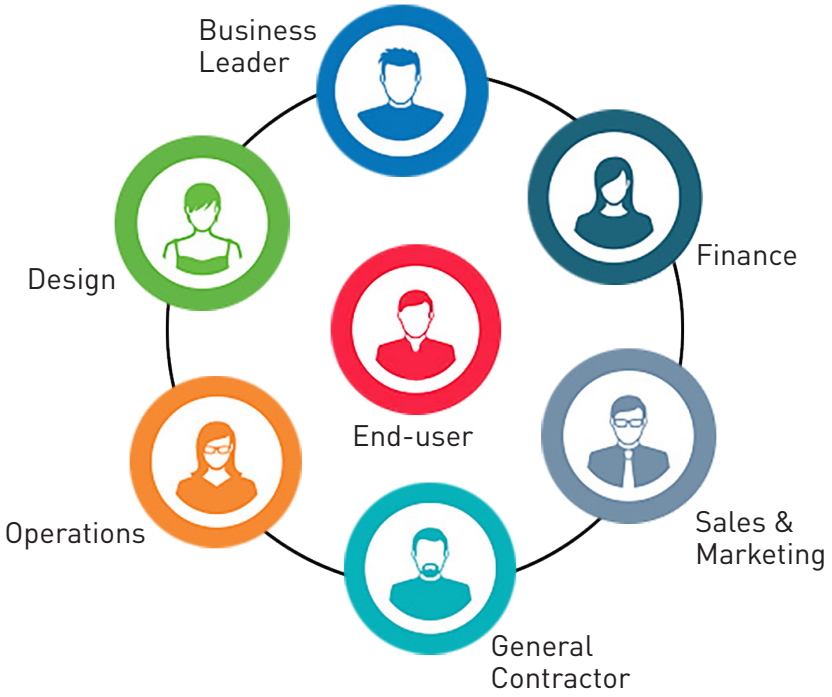
FINISH

STREAMLINE THE BUILDING PROCESS.

The interior building process can require multiple people and departments working together. Often times the need for modifications or changes pop-up, the process then becomes disconnected and finger pointing begins. The Emagispace® process can help you avoid these problems. EmagiBlock®s, because of their inherent flexible design, can accommodate changes and modifications with minimal additional cost and time. Ultimately creating a better end product and a happier end-user.

Typical Building Process

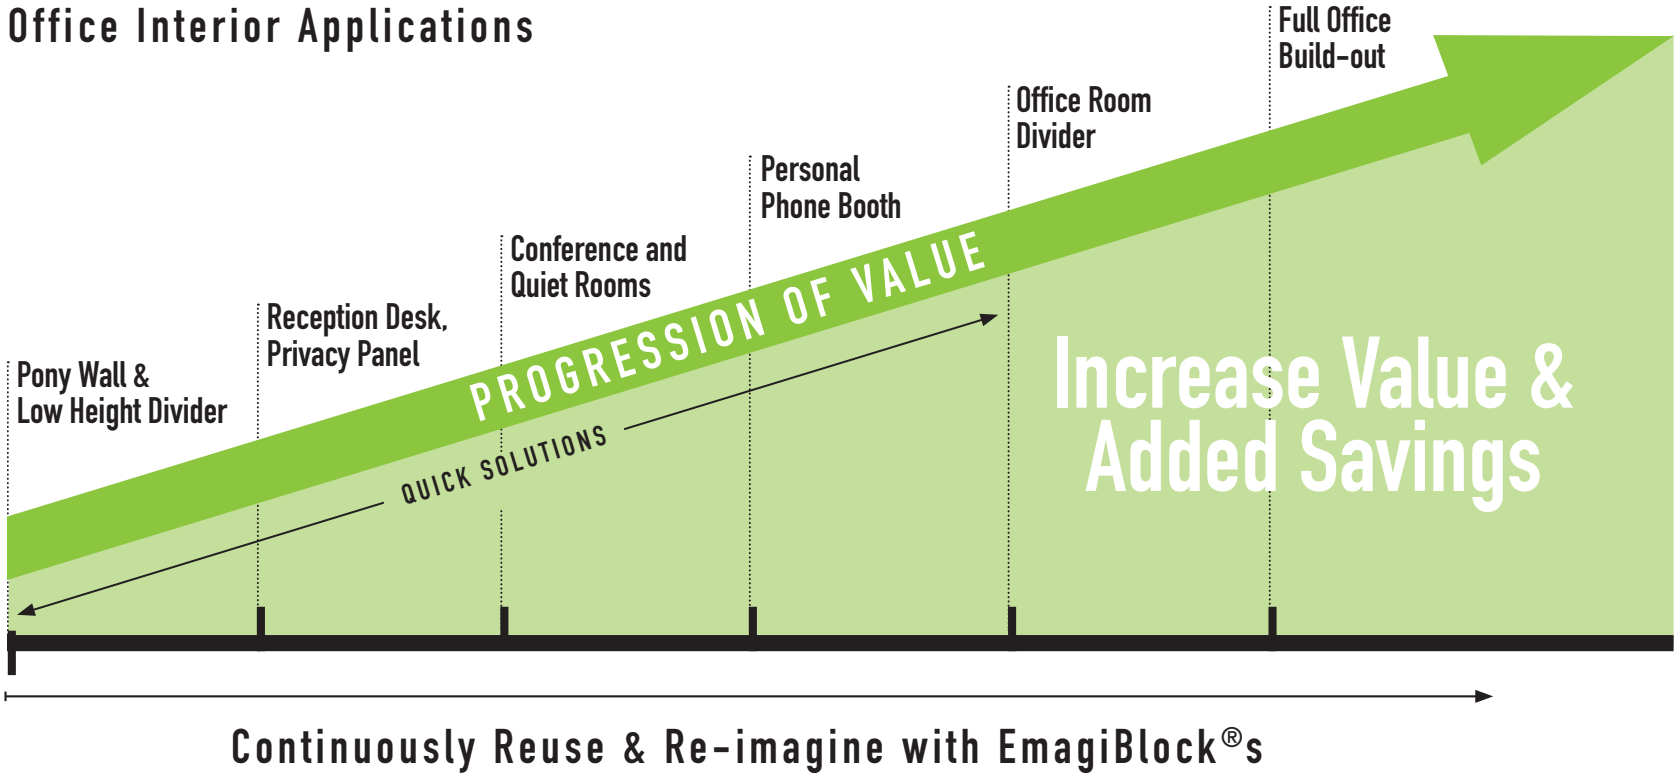
Emagispace® Building Process



MEASURING UP IN THE LONG RUN.

The growth value of Emagispace® is significant when used across a spectrum of office interior applications. For example, you can start with easy to assemble, quick solutions like pony walls, then add more value by creating a quiet rooms or full office build-outs.

Office Interior Applications



Continuously Reuse & Re-imagine with EmagiBlock®s

SMARTER BUILD

"Emagispace® was amazing to work with. From start to finish we were able to design, select look and feel, source and build in 60 days with construction only taking 4 1/2 days. I was able to move in that Monday! I made configuration decisions on the fly, and I know that I have the freedom and flexibility to change in the future. I won't hesitate to work with them again, in fact I've already ordered more!"
